

SHAIKH FAISAL

SOFTWARE ENGINEER

Bengaluru, India | +91 8548801347 | shaikfa66@gmail.com | linkedin.com/in/skffaisal

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in backend development and automation. Skilled in designing and building backend systems, APIs, and automated workflows. Has hands-on exposure to AI-driven features and integrations, adding intelligence to applications where needed. Comfortable adapting across the software development lifecycle to meet project requirements.

SKILLS

- Backend Development: Python, PostgreSQL, Firebase, FastAPI, REST APIs, API Integration, Backend Architecture, Authentication
- Artificial Intelligence: Generative AI, LLMs, RAG, AI Agents, Prompt Engineering, Chatbots, Workflow Automation
- Frontend & Mobile: JavaScript, React.js, HTML, CSS, Flutter
- Infrastructure & Tools: Docker, Deployment, VPS, Nginx, iptables, Linux, Windows, Git, GitHub, Postman, Redis, Celery
- Leadership & Delivery: Technical Team Leadership, End-to-End Project Delivery, Client Management, Cross-Functional Team Collaboration

PROFESSIONAL EXPERIENCE

Software Development Engineer

Winger IT Solutions | Full-time | Jul 2023 – Present

- Lead a team of engineers delivering custom software and AI-driven automation systems.
- Deploy and secure applications end-to-end, containerizing with Docker, provisioning VMs across on-premise and cloud VPS environments, and hardening access with iptables and Nginx reverse proxy configuration.
- Develop and integrate backend APIs, Generative AI models, and intelligent workflows.
- Own end-to-end project delivery, planning, architecture, development, testing, and deployment.
- Act as primary technical point of contact for client stakeholders, translating requirements into scalable system design.

Technical Analyst

Blume Global | Full-time | Sep 2022 – Jun 2023

- Collaborated with engineering teams to enhance logistics software for tracking, billing, and automation.
- Contributed to API testing for real-time shipment visibility.
- Assisted in resolving defects and bugs through analysis, improving overall system reliability.
- Worked with clients and teams to optimize supply chain processes and reporting.

PROJECTS

AI L1 Support Integration Module

- Built a customer-facing AI support module using a hybrid RAG pipeline (semantic + keyword search), automating first-line query resolution across the company's product suite.
- Achieved 40% query resolution rate at the L1 support level, reducing manual ticket load on the support team.
- Designed a human-in-the-loop escalation flow that auto-creates tickets for unresolved queries, ensuring no customer query goes unanswered.

GPS-Based Logistics Lock System

- Developed FastAPI backend services for OTP-based remote unlocking of transport container locks, replacing physical keys with a secure, time-bound authentication method.
- Implemented OTP generation and validation logic with a 1-minute expiry window, ensuring secure, time-limited access for field operations.
- Collaborated with a cross-functional team integrating GPS/GNSS hardware and 4G-based backend communication, contributing the authentication layer of the system.

Internal Automation Suite (Built for internal use at Winger IT Solutions)

- Email Validation Pipeline: Designed, built, and hosted an 8-step on-prem email validation system, completely eliminating recurring costs from third-party validation services.
- Email Campaign Orchestrator: Automated lead-gen outreach in the background, freeing up ~60% of the team's time for market research instead of manual campaign execution.
- Hardware Asset Tracking Tool (Live-USB Linux): Built a bootable diagnostic tool for an IT infra company managing thousands of client laptops/desktops, detects hardware changes or mishandling (RAM swaps, component changes, etc.) in 1-2 minutes without opening the device, replacing a fully manual inspection process.

EDUCATION

Bachelor of Engineering - BE, Electronics and Communication

Visvesvaraya Technological University |Bengaluru

2018 - 2022

CGPA: 8.42

CERTIFICATIONS & ADDITIONAL INFORMATION

- Certifications: Zoho Creator Developer (Zoho) · Cloud Technical Series: AI Deep Dive (Google) · Python for Data Science, AI and Development (IBM)
- Awards & Leadership: Speaker, AIDevCon India 2025 "The Role of AI in Modern Software Development" · Quarterly Medallion Award (x2)
